REED COLLEGE

In today’s rapidly changing and increasingly challenging times the pattern of education offered in Management courses has undergone a paradigm shift at REED College. The curriculum implemented for future managers/leaders goes beyond the stipulated syllabus of the University. With the project based and discovery learning, it aims to develop inquisitive, critical thinkers and self-directed learners.

REED College is located in peaceful surroundings in order to provide calm and serene atmosphere free from outside distractions and diversions. The college owns modern sets of infrastructure, playgrounds, multimedia learning, sophisticated computer lab and library which help students be resourceful in their academic quest.

Message from Chairperson

I am delighted to accommodate the success of REED Model School into next level in management education for higher studies. Today’s world is not just about what you learn and what you achieve, rather life in the twenty first century is about preparing to acquire global opportunities and expand the horizon of a student’s integrating communication, leadership, problem solving and decision making skills that is how the management education is evolving around to face the challenges existing to this era.

-Gopal Ghimire

Message from Academic Director

We ensure students to extract the higher sets of knowledge, insights and skills engaging them every moment as a part of global civil society where and how a student’s brought up. ICT has been the practicing tools for us to connect them through the lessons and learning schemes for ever all development of students. This is a part of realistic approach in education that is how we are integrated to attend the expectation of management students.

-Khan Raj Chhetri

Message from Principal

REED College which started as a small note in arena of education service is planning to stretch and spread its successful track records into higher education gateway. Adapting to the changing trends in the education system across the globe has been REEDs forte. Bringing innovative thoughts to impart value added education would put its students at forefront in building the nation.

-Khan Lal Pandey

Vision

To lead academia in Nepal for excellence by imparting international standard learning practices incorporating multicultural domains and social dynamics.

Mission

Providing value added education in the field of management and professional development integrating creativity, innovation and experiential learning to produce skilled, competent and versatile workforce.

Extra-curricular Activities

Extra-curricular activities are a very essential part of the students’ activities in the college. To bring fore the inner talents, students are encouraged and involved in several activities that suit to their taste. These activities help them to improve their communication skills, develop the right kind of attitude and outlook and build on leadership qualities. The college has appropriate infrastructure for activities and playgrounds in its premise.

Learning beyond Classroom (Experiential Learning)

We integrate experiential learning at the core teaching-learning methodology. Experiential learning includes the academic and industrial excursions, internship and project engagements. Alongside, to motivate the students, build confidence in their ability, expand their network and to keep them abreast with the latest technology, REED has designed interactive and practical based learning through interaction programs - includes group discussions, seminars, guest lectures, paper presentations, mini projects, video conferencing, blogging, workshops and so on.

Faculties

Growth and development is at fast pace in all walks of life, all the courses are monitored and implemented by experienced, professionally acclaimed market led highly qualified faculties. The integration of teaching, experiential learning and research has been a major force for enriching the quality and relevance of education imparted to students at REED College. To explore the inner talent and unleash creative thinking in students, college encourages the faculties to involve students in their research and personal development activities.

The Program

The four years BBS program, affiliated to Tribhuvan University, includes and offers the most essential elements in contemporary management practice and has recently updated curriculum to mitigate international standards. The entire 4 years program contains project works, presentation, internship and specialization with elective subjects.
Value Added Skills
Education has been into a paradigm shift, set of soft skills must be integral part into learning practice to deliver a skyrocketing career. We conduct regular non credit courses for our students to impart the essential skills to mitigate the professional quest aftermath of graduation. Reputed and renowned academicians, professionals and icons from different parts of the country and abroad are invited to the institute to share their experience with the trainees. interest and individual goal, we assist on Career Design, Higher Education Planning, Entrepreneurial and Business Skills. We essentially focus on Communication and Presentation Skills, Leadership, Project Management, Proposal writing, Report writing, Executive Writings, Computer skills and Accounting trainings.

Placement
The College has a placement cell that takes care of students grooming, internship and employment opportunities. For this purpose the college is tied with many companies, financial institutions, renowned industries and organizations, and also works closely with reputed placement agencies in country. The placement cell also conducts the sessions for required skills to beat the job along with entrepreneurial development.

Hostel and Transportation
REED has managed the Hostel for students who wish to stay in homely environment. The hostel contains two blocks to accommodate boys and girls separately. The hostel is located at 5 minutes walking distance from the College and is well maintained with the hygiene and academic environment. The college has its own transportation to make a safe, cozy and timely riding for students upon their choice.

REED Collaborative Approach
REED is striving to acquire global outreach to deliver a wider network and global atmosphere into the process of academia. REED has been working for academic and technical collaboration with international academic institutions in Australia, UK, Norway and Singapore for mutual exchange programs. The faculty and students would immensely benefit from the online lectures conducted by eminent professors of different institutions through video conferencing exposure which gives students a head start in this competitive world. Earnest efforts are on to have tie ups with more number of internationally renowned institutions, organizations and industries would boost the associate students for better future.

Library and Labs
REED college has most updated versions of curriculum related books, reference books, journals, video and CDs and other materials located in stacks. Skill in information technology and computer has been the core to current job market. To cater these skills the college has managed the sophisticated computer lab and multimedia learning centers with recent technologies.

Eligibility
Students who have completed management or science in +2 levels with minimum 45% are eligible to apply for the BBS program. The initial process includes submitting a completed form. The candidates are required to appearing the entrance test and oral interview to meet the selection criteria.

Scholarships
The REED College provides full and partial scholarship under various categories includes needy and deserving students, physically challenged and to the underprivileged backgrounds. Besides this the meritorious scholarship are offered to the deserving students in each section.
